Dan,
Lee Heeren (IEPA) and Cheryl Burdett (EPA enforcement) have had some recent discussions relating to the status of Allen Barry Livestock. Below is an recent email from Cheryl to Lee explaining EPA's planned course of action to address the outstanding NPDES permit matters relating to Allen Barry. I will ask Cheryl to include you on any email relating to the results of EPA's planned inspection at Allen Barry.

We have are renewal application for this CAFO that we have been reporting Exemption 5 and Exemptions in CAFO tracker. This project shows in our old NPDES backlogs as expired and is contributing to our overall backlog numbers, which we are trying to reduce to a target set with Region 5. I have asked our FOS what status is and they are deferring to Region 5 on status. It is unclear from the email I got why we are waiting on Region 5 for moving this project forward toward reissuance or termination of the permit. We/IEPA/FOS did send an NOI letter in February, 2010 to

Barry and to my knowledge have received no response. Let me know if there is reason we should not be following up with Allen Barry on this application or what it is that Region 5 is planning on doing to resolve this case so we can further act on this application.
